

# **crossdoxx**

## **digital document management**

## Your requirements

“ We **print and receive many documents** such as **invoices, delivery notes** etc. which makes document filing **time-consuming**. ”

“ Our company has **many different offices**. The aim is to make **collaboration more efficient** and communication channels should be simplified and shortened. ”

“ We work with **sensitive documents** which require a high level of security. All documents must be transferred and stored **securely** and **in compliance with data privacy**. ”

## Our solution: crossdoxx

crossdoxx is the **platform for efficient collaboration in your organization as well as with external partners and customers**.

With crossdoxx, we offer you a **cloud-based document management system** with the **highest security level**.

### DIGITALIZATION

- | Import and store all documents digitally
- | All documents structured in one place
- | No more excessive paper use
- ➔ **Sustainability and clarity!**

### DATA SECURITY

- | In compliance with data security guidelines
- | Revision-proof storage through automatic creation of new versions
- | Based on a certified DMS according to BSI C5 for the storage of unstructured data
- | The C5 is currently considered the most important and comprehensive attestation for the security of cloud services and is required for all cloud products used by federal agencies and ministries by the BSI.
- ➔ **Security and compliance!**

### WORLDWIDE ACCESS

- | Elementary success factor through efficient use within your organization
- | Reliably protected and encrypted documents
- | All documents available for all authorized parties at any place and at any time – even in offline mode
- ➔ **Fast accessibility and availability!**

### EFFICIENT COLLABORATION

- | Easily exchange data in your company and with external participants
- | Professional, safe and modern
- | Link all types of files with contacts, comments and tasks
- ➔ **Optimized communication and coordination!**

**Easy collaboration with smart solutions**

### LOWERING YOUR IT-COSTS

- | All inclusive package: servers and maintenance managed by us
- | Time-consuming backups and expensive license contracts as part of the past
- | Intuitive use and interactive workshops instead of training marathons
- | Desktop, browser and mobile version without installation costs
- ➔ **Efficiency and cost saving!**

### EASY TO USE

- | Upload documents via drag & drop function
- | Scan-to-collection function
- | Upload documents manually, via link, e-mail or SFTP
- | Import and scan with mobile app
- | Full text search for terms, comments and collections – also within metadata
- ➔ **Minimal effort and time saving!**

### SEAMLESS INTEGRATION

- | Easily integrate existing system landscapes with Restful API interfaces
- | Customizable workflows and apps thanks to open and secure system architecture
- ➔ **Information availability without media discontinuity!**

**Fully automated storage of your documents**

## ... your corporate goals in view:

- | **Reduce unproductive working hours**
- | **Reduce manual effort** of recurring tasks
- | **Access information faster**
- | **Benefit from a reliable software-as-a-service model to focus on your core business**
- | **Optimize communication & coordination for more efficient collaboration**
- | **Access information across different systems without media discontinuity**

## Your advantages at a glance
