

Our mission: Optimized [log]istics

True to our motto, "Optimized logistics", we provide high quality products and services covering the optimization of your entire supply chain. We are a team of experts from the IT and logistics industries and have specialized in the development of innovative and integrated solutions for business processes. We offer adaptive solutions from a single source in order to actively support your company concerning digital transformation. Furthermore, we offer assessments and consulting services on the digitalization and optimization of your administrative and logistic processes with a focus on medium-sized companies.

Benefit in international projects from the expertise of our broadly-based team and our network of excellent specialists and long-term partners as well. Convince yourself of our strong service portfolio in all questions concerning logistics and IT.

Our range of services covers three business units:

 **Projects & Consultancy**

Weather project participation, project documentation or project management of complex change projects – development accompanies you with an holistic approach. In addition to project support, we provide you with consulting services for the digitalization of your business processes as well as all issues concerning the IT used in your company. We attach great importance to the fact that you do not perceive us purely as consultants. Instead, we see ourselves as your sparring partner who, jointly with you, will determine and exploit your actual future used potential.

Our services

- | Assessments and consulting services for the digitalization and optimization of logistic processes
- | IT strategy consulting and IT audits
- | Advise on software selection
- | Process documentation (including KPI analyses)
- | Project management / participation

 **Logistic Solutions**

Our software products for process automation are intuitive to use, integrate themselves seamlessly into existing system landscapes and reduce media breaks during processing of information. The Digital Document Management System **crossdoxx** manages documents and files efficiently and securely. Our Business Process Automation Software **crosslinxx** automates complex and comprehensive business processes along the entire supply chain. This allows operational flexibility and quick successes. Our experts will assist you in your selection and introduction of software products and if necessary, develop specifically tailored solutions for your company.

Our services

- | crossdoxx and crosslinxx
- | Development of individual software-solutions
- | Customized mobile Apps

 **Managed Analytics**

Today, data is available in abundance – but how do you filter out the relevant information for your company? With our service **Managed Analytics**, we provide you with solid data analysis including a continuous display of figures in real time. This data can be used to make both informed strategic decisions and to assist with your daily business. Furthermore, in supply chain management, we closely examine your entire value chain and we will actively assist you in the areas of procurement and distribution.

Our services

- | Big data analytics
- | Supply-chain analysis and -design
- | Tender management
- | Supplier management
- | Carrier and transport performance management
