➔ **SEAMLESSLY INTEGRATED!**

SPECIALIZED IN HAZARDOUS GOODS

- | Conformity-assured approval situation on storing position level
- | Highest productivity
- | ADR, ADN, IMDG, ICAO, RID compliant
- | TRGS510
- | Waste transports

➔ **MARKET LEADING!**

AUTOMATED BEST-PRACTICE PROCESSES

- | Proactive business process control via intelligent workflows
- | Process-controlled document management
- | Real-time controlling with informative data analysis and KPI reports

➔ **READY FOR IMMEDIATE USE
AND FLEXIBLY ADAPTABLE!**

More than
**1.500 satisfied
customers**

More than
1.6 billion
transactions
per year

HIGH OPERATIONAL FLEXIBILITY

- | Integration of new warehouse customers and new sites independently of software provider
- | Reduced training times and expenses
- | Globally usable
- | Multilingual

➔ **INDIVIDUALLY ADAPTABLE!**

FUTURE-PROOF IT TECHNOLOGY

- | Scalable with assured data integrity
- | Open interface architecture for easy data exchange
- | High availability:
24 / 7 operation in ISO / EC 27001 certified data centers in Germany

➔ **FUTURE-PROOF!**

SUITABLE FOR GROUPS

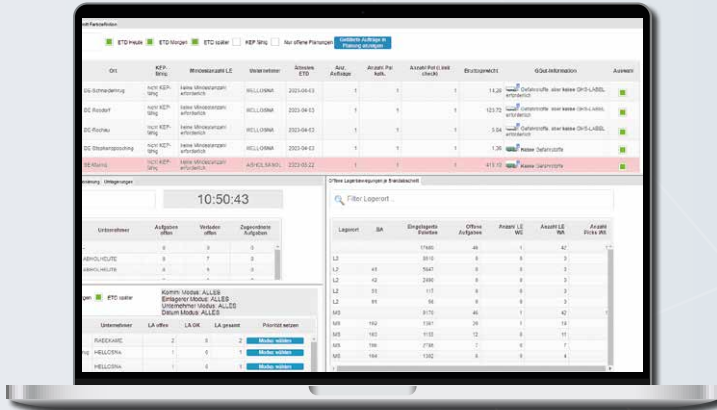

- | Consolidations across legal entities
- | Integration of country-specific financial accounting
- | Multi-currency capability
- | Mapping of internal activity allocations
- | Cost center and cost unit accounting

➔ **INTEGRATION OF ALL PARTICIPANTS!**

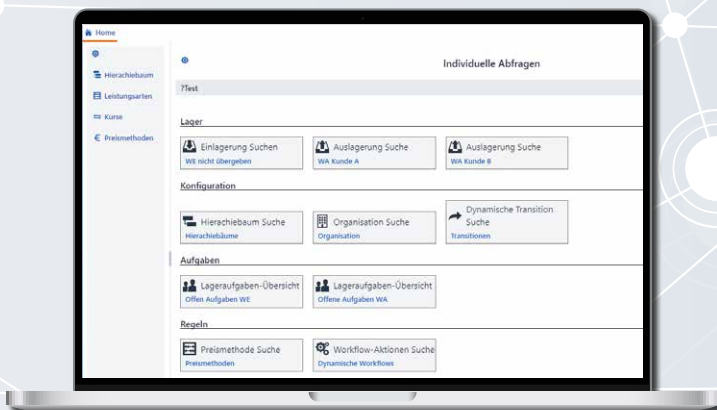

Runs on all
browser-enabled
end devices

Transport Management: Truck, barge, container, airplane

**Fast
responsiveness
through early
warning systems**

TRANSPORT

- Pre-planning via routing tables and automated scheduling
- Organization of transports for restocking
- Constant exchange between stock movement and linked shipment
- Use of shipment templates
- Graphic and list-based scheduling

YARD MANAGEMENT

- Comprehensive shipment management
- Integration of external time slot booking portals
- Digital truck check (ADR control, customs, fumigation)

TRACK & TRACE

- Map display, incl. vehicle location and planning functions
- Proactive control of multimodal transports
- Event-driven escalation routines
- Full integration of partner companies

SHIPPING

- Creation of order-related shipping-units, incl. SSCC and SCTT specifications
- Loading scanning for different shipping options (single order, loading list, etc.)
- SOLAS-compliant shipping documentation

Process Automation: Your productivity lever

- | Guided task management
- | Digitalized approval processes
- | Automated sending of e-mails and documents
- | Integration of decision tables
- | Integration of services
(e.g. weather forecasts and traffic jam reports)
- | Integrated time control, resubmission function and escalation routines
- | Seamless integration of external partners and sub-service providers – without interfaces

Data Analysis: Your basis for continuous improvement

- | Evaluation of all (process) KPIs
- | Generation of dashboards
- | Customizable configuration
- | Analysis of complex issues
- | Profit center, cost center and cost unit accounting

Document Management: Seamlessly integrated

- | Worldwide digital data access
- | Reliably protected and encrypted data
- | Efficient collaboration
- | Cost savings and intuitive operation
- | Available as web client, desktop client and Android / iOS app

Integrated functionalities

ORDER

- | Creation of production, delivery or shipment orders from customer notifications
- | Connectivity to external products
- | In-house web shop

QUALITY CONTROL

- | Management of inspection plans and orders, usage decisions and certificates of analysis
- | Integration of damage management
- | Support for in-process controls

ACCOUNTING

- | Mapping of complex accounting rules, e.g. freight times, stock movement, inventory characteristics, alternative settlements
- | Analysis of all activities along the supply chain
- | High flexibility in the billing system
- | Integration of incoming invoice workflow with OCR functionality
- | Automated billing across modules
- | Invoicing of services to customers, suppliers and internally

Warehouse Management: Multi-customer and multi-site

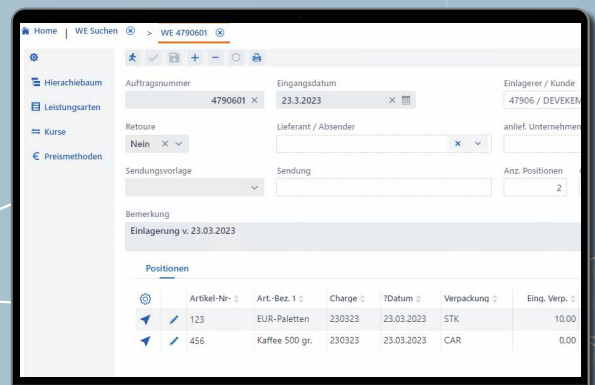

STORAGE

- Flexibly definable storage strategies with multidimensional combinatorics
- Mapping of different storage types and categories
- Automated storage location determination
- Management of customs, tax, quality and blocked stocks as well as returns
- Comprehensive inventory management, optionally scanner-guided
- Execution of ownership changes without physical movement of goods

PICKING

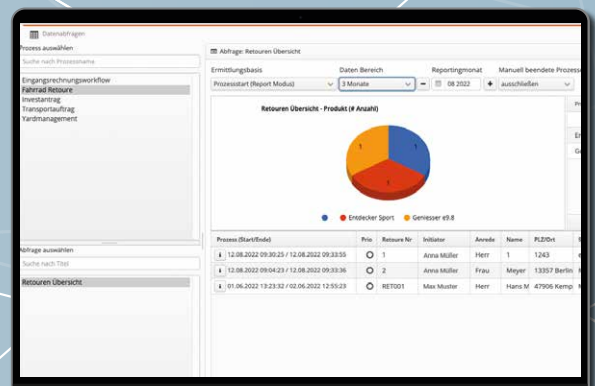

- 1- or 2-step picking (paper-based or paperless) and package picking
- Task-oriented and route-optimized warehouse control
- Mapping of individual picking strategies
- Tracking of the shipping unit at the warehouse by zones across locations

Production Management: Entire value chain

PRODUCTION

- Seamless integration of the production module into the entire logistic process
- Cross-site production planning, incl. MRP run
- Recipe and stock list management
- Graphical production planning

Our scope of services

CONSULTING

Aligning goals, value levers and approach.

IMPLEMENTATION AND DATA / SYSTEM INTEGRATION

Seamlessly integrating the existing.

deve[log]ment®

GO-LIVE SUPPORT

Ensuring success.

TRAININGS

Qualifying users.
